DESCRIPTORS: Paleontology, *Homoptera, Insects,
Taxonomy, *Evolution, Ecology, Adaptation
(Physiology), *Genetics.

An historical investigation of the development of the
Homoptera discloses that the origin of the Homoptera
is the result of a new trait in the blatoid ancestors
with rasping maxillae. This new trait, a singular type
of exchange with the environment, specifically, the
sucking of plant sap, entailed the development of a new

A number of new genera in various superfamilies of
